

ELLIOTT EBARA & FRONTKEN FORMS SERVICE PARTNERSHIP

Elliott Ebara Singapore and Frontken Singapore have teamed up as your local service provider leveraging on our combined resources and capabilities.

Elliott Ebara as a global machinery OEM and Frontken with its local workshop presence in the region, the end user can be assured of a **comprehensive service**.

This alliance has engineering support & technology developments based on a century of experience as an **OEM of Turbomachinery**, with tens of thousands of machines operating in the process and power industries worldwide coupled with a regional presence spanning **Singapore and Malaysia**.

The strategically located Frontken workshops are **ISO 9001:2000 approved**, perfect to carry out **rotor inspections, along with repairs inclusive of dynamic balancing**.

The metallurgical testing laboratories based within the major workshops are ideal to conduct failure analysis, root cause determination and components testing.

Under the guidance of a major OEM, the local workshops are well placed to carry out standard repairs and performance upgrades for **all makes of Turbomachinery**.
